Daniel Kim

Security Engineer

daniel.kim@example.test | Washington, DC | portfolio.example.test/danielkim

PROFESSIONAL SUMMARY

Built detections in Splunk and AWS Security Hub for cloud workloads. Led threat modeling for five services and closed 42 high priority findings. Wrote incident runbooks and reduced triage time 35 percent.

TECHNICAL SKILLS

Python, SIEM, Splunk, AWS Security Hub, IAM, threat modeling, incident response

PROFESSIONAL EXPERIENCE

Built production REST APIs using Python and FastAPI.

Worked with PostgreSQL and Redis for backend data services.

Wrote automated tests and CI/CD pipelines for production releases.

Deployed Docker services on AWS.

Diagnosed production issues and collaborated with product engineers.

Maintained service documentation and participated in code reviews.

Optimized API latency and database queries.

Security Engineer | BlueOak Technologies | 2024 - Present

- Built detections in Splunk and AWS Security Hub for cloud workloads. Led threat modeling for five services and closed 42 high priority findings. Wrote incident runbooks and reduced triage time 35 percent. Collaborated with product and engineering partners to deliver measurable customer outcomes.
- Owned technical planning, code reviews, and production support for work aligned to Python and adjacent systems.

EDUCATION

B.S. Cybersecurity, George Mason University, 2019

SELECTED PROJECTS

Security Engineer portfolio project: built and documented a production-style solution using Python, with tests, monitoring, and a short implementation guide.
