Mateo Silva

Embedded Software Engineer

mateo.silva@example.test | Phoenix, AZ | portfolio.example.test/mateosilva

PROFESSIONAL SUMMARY

Developed C++ firmware for connected devices shipped in 250K units. Implemented SPI drivers and RTOS scheduling improvements. Reduced boot time 25 percent and built hardware in the loop tests.

TECHNICAL SKILLS

C, C++, embedded Linux, RTOS, UART, SPI, Git, hardware debugging

PROFESSIONAL EXPERIENCE

Built production REST APIs using Python and FastAPI.

Worked with PostgreSQL and Redis for backend data services.

Wrote automated tests and CI/CD pipelines for production releases.

Embedded Software Engineer | BlueOak Technologies | 2024 - Present

- Developed C++ firmware for connected devices shipped in 250K units. Implemented SPI drivers and RTOS scheduling improvements. Reduced boot time 25 percent and built hardware in the loop tests. Collaborated with product and engineering partners to deliver measurable customer outcomes.
- Owned technical planning, code reviews, and production support for work aligned to C and adjacent systems.

EDUCATION

B.S. Electrical Engineering, Arizona State University, 2018

SELECTED PROJECTS

Embedded Software Engineer portfolio project: built and documented a production-style solution using C, with tests, monitoring, and a short implementation guide.
